WORK EXPERIENCE

Thinix Ames, Iowa

Full Stack Developer

May 2017 - Present

Upgraded Angularjs application to Angular 2 while implementing best practices.

Collaborating in a small group utilizing Agile methodology.

Develop full stack features in a RESTful C# environment using ASP.NET MVC Framework.

Write and improve complex SQL queries

Iowa State University Ames, Iowa

Teaching Assistant

January 2019 - May 2019

Manage small teams while they produce a semester long application.

Research better ways to teach software development concepts.

Grade assignments, set up meetings, report and document student progress.

PROJECTS

uPick Personal Project

Web application I built my freshman year to teach myself full stack development. This application helps users find a movie to watch and where to watch it.

Typescript

Angular2

PHP

SQL

Meet and Manage COMS 309

Web application to help students organize their busy schedules. I was the team lead so this was a good opportunity to use my skills to teach the rest of the team about the frameworks and how to manage client/server relationships.

Angular2+

PHP

SQL

Laravel

CAMPUS INVOLVEMENT

Outreach Chair Critical Tinkers

Coordinate events with local schools to engage and teach young students about engineering

Brainstorm and carry out fun events to peak the interest of young students

Mentor HackISU

Assisted students with varying skill levels in different stages of development and a wide array of technologies

Helped assign out tasks to improve involvement and collaboration within groups
